

Ralton High Yield Australian Shares

Designed to provide investors with a consistent, tax-efficient and growing cash dividend yield as well as long-term capital growth, the Ralton High Yield Australian Shares managed account invests in a concentrated portfolio of mid and large-capitalisation Australian companies.

Reasons to invest

- 1. Concentrated portfolio of mid and large-cap Australian equities**
Access a portfolio with low turnover of 20 to 35 mid and large-cap stocks that offer attractive value relative to the market.
- 2. Capital growth and income plus the benefit of franking credits**
The potential for long-term capital growth and a dividend yield higher than the share market.
- 3. Seasoned investment professionals**
Access the extensive investment management expertise of Andrew Stanley, Roger Walling and the Ralton Asset Management team, with Andrew and Roger having managed Ralton's portfolios together since inception.
- 4. Tax-efficient managed account structure**
Benefit from the beneficial ownership and transparency of the underlying securities, centralised management of activities, such as stock selection, portfolio construction, trades and corporate actions, and the tax advantages of a professionally managed account.
- 5. Proven process, strong long-term track record**
Proven investment process with a thematic value bias that has delivered investors strong long-term returns across all market cycles.
- 6. Alignment of investor interest**
Aligned interests with investors due to the Ralton team's ownership of the business and personal investment in the underlying portfolios.

Morningstar
4 stars

Overview

The Ralton High Yield Australian Shares portfolio is a professionally constructed managed account that invests in quality ASX-listed companies the Ralton team assesses as likely to provide attractive long-term returns (capital growth plus above-average yield and franking) and, at the time of purchase, are either included in the S&P/ASX 300 Accumulation Index or are one of Australia's largest 300 companies based on market capitalisation.

Investment objective

The Ralton High Yield Australian Shares portfolio aims to provide investors with consistent, tax-efficient and growing cash dividend yield, as well as long-term capital growth. The portfolio seeks to deliver a return superior to that of the market over periods of five years or more and an above-market yield.

Investment approach

Ralton applies a thematic value approach to its investment process believing it provides the best opportunity to capture and take advantage of market inefficiencies through market cycles.

Intensive bottom-up research of target companies is the cornerstone of Ralton's investment process, which it supplements with top-down economic and thematic views. Disciplined and consistently applied, Ralton uses a number of proprietary qualitative and quantitative techniques in its process to thoroughly scrutinise companies so as to uncover undervalued businesses.

Ralton aims to invest in companies with:

- strong and reliable management
- good profit and dividend growth expectations
- reasonably predictable future profits and cash flows, and
- clear business models.

“Our view is that although capital markets are reasonably efficient, the intrinsic (or true) value of a company is not always reflected in the market price of its securities, both in an absolute and relative sense. Through our proprietary and disciplined investment process, we believe we can consistently identify and exploit this mispricing for the long-term benefit of investors.”

Andrew Stanley
Head of Australian Equities
