

TT Global Environmental Impact Fund

Product Disclosure Statement | Date of issue 19 December 2024

This Product Disclosure Statement (PDS) is issued by Copia Investment Partners Ltd (ABN 22 092 872 056, AFSL 229316) (Copia, we, our or us), as the responsible entity (RE) of the TT Global Environmental Impact Fund (ARSN 650 685 439 APIR OPS4597AU (Fund)). The Fund invests in shares in the TT International Funds Public Limited Company, which is authorised as an Undertaking for Collective Investment in Transferable Securities (UCITS) and organised under the laws of Ireland. The Fund will invest exclusively in shares that are attributable to the TT Environmental Solutions Fund (Underlying Fund), which is a sub-fund of the TT International Funds Public Limited Company.

This PDS provides a summary of significant information about the Fund. It contains a number of references to important information contained in the 'Additional Information' document (Additional Information or AI), which forms part of this PDS. A glossary of certain terms used in this PDS is set out in the AI. The PDS and AI are available at copiatt.com.au (the website) or you can request a copy free of charge by contacting Copia on 1800 442 129 or via email at clientservices@copiapartners.com.au.

This PDS does not constitute an offer in any jurisdiction other than Australia or to anyone whom it would not be lawful to make such an offer. It is important that you should consider the information in this PDS and the AI before making a decision about the Fund.

The information in this PDS is general information only and does not take into account your financial situation or needs. You should obtain financial advice tailored to your personal circumstances. Information in this PDS or the AI may change from time to time. Any update to information that is not materially adverse to investors will be provided at copiatt.com.au. Please check the website or contact Copia or your financial adviser for any updates prior to investing. A paper copy of any update will be provided free of charge on request.

CERTIFIED BY RIAA

1. About Copia Investment Partners Ltd

Copia holds Australian financial services licence (AFSL) number 229316 and is the responsible entity (RE) of the Fund. Its role includes holding the Fund's assets on trust for investors and investing the Fund's assets in accordance with the Fund's constitution and any applicable laws. As RE, Copia's responsibilities and obligations are governed by the Fund's constitution, the Corporations Act 2001 (Cth) (Corporations Act) and general trust law.

The RE has appointed a custodian to hold the Fund's assets (Custodian). The RE will pay the Custodian a fee for acting as the Fund's custodian. This fee is not an additional fee to you and is included in the management costs described in the PDS.

In its role as custodian, the Custodian safekeeps assets of the Fund. The role of the Custodian is limited to holding assets of the Fund and it has no supervisory role in relation to the operation of the Fund. The Custodian does not make investment decisions in respect of the assets held or manage those assets, and has no liability or responsibility to investors in the Fund. Additionally, the Custodian is a paid service provider and is not responsible for the preparation of this document and therefore accepts no responsibility for any information in this document. The custodian may be changed from time to time and we may change the custodian where we are satisfied that the proposed new custodian meets applicable regulatory requirements. You will not be notified of a change in custodian.

TT International Asset Management Ltd

TT International Asset Management Ltd is the investment manager of the Underlying Fund. The Underlying Investment Manager is an investment management firm that is authorised and regulated by the Financial Conduct Authority. The Underlying Investment Manager is responsible for managing the assets and investments of the Underlying Fund. TT is a global investment management firm specialising in long only and alternative investment strategies for sophisticated clients around the world. It has a broad range of highly experienced investment teams managing a suite of products across diversified markets and regions.

You should read the important information about Copia Investment Partners Ltd before making a decision. Go to the 'About Copia Investment Partners Ltd' section of the Additional Information. The material relating to Copia Investment Partners Ltd may change between the time when you read this PDS and the day when you acquire the product.

2. How the Fund works

The Fund is a managed investment scheme in which funds subscribed by individual investors are pooled to buy assets on behalf of all investors. The Fund invests directly into the Underlying Fund, where assets are selected and managed by a professional team.

The Fund is established under a constitution, which sets out your rights, as well as the powers and responsibilities of Copia. You can obtain a free copy of the constitution by contacting us.

Investors are issued units which entitle them to a proportionate interest in the income and assets of the Fund. Investors do not have an entitlement to any particular asset of the Fund. The Fund's assets are valued in accordance with the Fund's constitution based on market values. Unit prices will vary as the market value of the Fund's assets rises and falls.

A unit price is calculated each business day by dividing the Fund's net asset value (NAV) by the number of units on issue. An allowance for transactional and operational costs incurred in buying and selling the Fund's assets may be added to or subtracted from the Fund's NAV to determine the applicable application price and a withdrawal price. The amount an investor pays for its share of these transactional and operational costs is known as the 'buy/sell spread' (see 'Transactional and operational costs and buy/sell spread' under the heading 'Additional explanation of fees and costs' in the Additional Information for more information).

When you invest in the Fund, you will be issued a number of units calculated by reference to the applicable unit application price. When you withdraw from the Fund, your units will be withdrawn at the applicable unit withdrawal price. The most recent unit prices are available on the website, and the link to this is accessible on page 1.

Making an investment in the Fund

To invest in the Fund, complete the form at the back of this PDS titled 'TT Global Environmental Impact Fund Application Form'. See 'How to apply' for more information. You can add to your investment at any time by sending us a new application form with your investment amount or by completing an 'Additional Investment Form' which you can obtain by contacting us. Applications can be made at any time. If your TT Global Environmental Impact Fund Application Form (or Additional Investment Form) and application monies are received and identified (and accepted by us) by 2.00 pm AEST on a business day, it will generally be processed with the entry price calculated for that business day. Applications received and identified (and accepted by us) after 2.00 pm AEST on a business day (but by the next cut-off time) will generally be processed using the entry price calculated for the next business day.

For example:

- An application accepted by us at 11.00 am AEST (therefore before the 2:00 pm AEST cut-off) on a Tuesday (which is a business day) should generally be processed with the entry price calculated using closing prices of the Underlying Fund in Dublin Irish Standard Time on Tuesday.
- An application accepted by us at 4.00 pm AEST on a Tuesday (which is a business day) i.e. after the 2:00 pm AEST cut-off for Tuesday, should generally be processed with the entry price calculated using closing prices of the Underlying Fund in Dublin Irish Standard Time on Wednesday.

You can make payment by direct-debit, EFT, bank cheque or personal cheque - see the TT Global Environmental Impact Fund Application Form for more information. Monies must clear before we issue units in the Fund. Copia reserves the right to reject an application for units.

A copy of the TT Global Environmental Impact Fund Application Form is attached to or accompanying this document. Additional application forms are available on the website or by calling Copia on 1800 442 129.

Investments and withdrawals

You can make investments and withdrawals at any time based on the following requirements (which we may change at our discretion):

Initial investment	\$5,000
Additional investment	\$1,000
Withdrawals	\$1,000
Switches	\$1,000
Minimum account balance	\$5,000

Copia is entitled to retain any interest earned on the application money before it is paid into the Fund.

Making a withdrawal from the Fund

You can withdraw all or part of your investment by completing a 'Withdrawal Request Form' and returning it to us via post, fax or mail. A Withdrawal Request Form can be obtained by contacting Copia.

If your withdrawal request is received and identified (and accepted by us) by 2.00 pm AEST on a business day, it will be generally processed with the exit price calculated for that business day. Withdrawal requests received (and accepted by us) after 2.00 pm AEST on a business day (but by the next processing cut-off time) will generally be processed using the exit price calculated for the next business day.

For example:

- A withdrawal request accepted by us at 11.00 am AEST (therefore before the 2:00 pm AEST cut-off) on a Tuesday (which is a business day) should generally be processed with the exit price calculated using closing prices of the Underlying Fund in Dublin Irish Standard Time on Tuesday.
- A withdrawal request accepted by us at 4.00 pm AEST on a Tuesday (which is a business day) i.e. after the cut-off for Tuesday, should generally be processed with the exit price calculated using closing prices of the Underlying Fund in Dublin Irish Standard Time on Wednesday.

We usually pay withdrawal proceeds directly to your nominated bank account within ten business days of receiving a withdrawal request. Under the Fund's constitution, we have a right to refuse to give effect to a withdrawal request in whole or in part and may do so without giving any reasons to the investor.

Restrictions on withdrawals

We may suspend withdrawals for a period of 120 days from the day on which units would have been withdrawn or for longer where the redemptions are unable to be made in the Underlying Fund. In some circumstances, such as when there is a freeze on withdrawals, members may not be able to withdraw their funds within the usual period upon request. The circumstances in which we may freeze the withdrawal of units in the Fund include where the valuation of the Fund's assets is not possible or where we reasonably consider that it is in the interests of the investors to do so.

Transfers and switching

You can transfer your units in the Fund to another person (unless we do not consent to the transfer) or switch from the Fund to other funds operated by Copia. Contact Copia on 1800 442 129 for more information and to obtain the relevant forms.

An investor may incur a cost in switching between our funds through the buy/sell spread process (for information on the buy/sell spread of the Fund, see 'Transactional and operational costs and buy/sell spread' under the heading 'Additional explanation of fees and costs' in the Additional Information).

2. How the Fund works (continued)

Income distribution

The Fund may earn income such as dividends and interest, as well as net realised capital gains, on the sale of assets of the Fund. Any Fund income is distributed every year. However, the Underlying Fund intends to reinvest any income and profits, and therefore does not intend to pay any dividends to holders of interests in the Underlying Fund.

Any net income and realised capital gains generated by the Fund are distributed to investors yearly, usually within two months following the end of 30 June. The Fund's unit price will generally fall following the end of a distribution period reflecting the amount of income and capital gains paid out to investors by the Fund.

The distribution amount will vary between distribution periods due to market conditions and investment performance, and the making of any distribution is not guaranteed.

Subject to the terms of the Fund's constitution, there may be times when a distribution is not made by the Fund and times when a 'special' distribution is paid outside of usual distribution periods. Distributions will be made to investors of the Fund pro rata to the proportion each investor holds in the total number of units on issue in the Fund. We may pay distributions via a 'non-negotiable' cheque, deposit them directly into a bank account or reinvest as additional units.

Units issued on reinvestment of any distribution are issued at the unit price at the start of business on the first business day of the new distribution period.

We ask investors to nominate their preferred method of distribution on the TT Global Environmental Impact Fund Application Form. If you do not make a choice, we will automatically reinvest any distributions

on your behalf into the Fund. We will distribute any franking credits or foreign tax credits generated during the period with the 30 June payments.

For more information on the acquisition, holding, transfer and disposal of units in the Fund please refer to 'About the TT Global Environmental Impact Fund' in the AI.

Platform investors

If you are investing through a master trust, wrap account, investor directed portfolio service, investor-directed portfolio-like scheme or similar arrangement (collectively referred to as a 'platform'), then it is important to understand that generally it is the platform that becomes the investor, not you. It follows that the platform has the rights of an investor and we recognise it alone can exercise them. If you invest through a platform, you may also be subject to different conditions from those outlined in this PDS (such as procedures for making investments and withdrawals, cooling-off periods, cut-off times for transacting and additional fees and costs). The RE authorises the use of this PDS by investors who wish to access the Fund through a platform.

Copia is not responsible for the operation of any platform. If you invest through a platform, in addition to reading this PDS, you should read the document that explains the platform service. You should read the important information about the acquisition, holding, transfer and disposal of units in the Fund before making a decision. Go to the 'About the TT Global Environmental Impact Fund' section of the Additional Information. The material relating to the acquisition, holding, transfer and disposal of units in the Fund may change between the time when you read this PDS and the day when you acquire the product.

3. Benefits of investing in the TT Global Environmental Impact Fund

Significant features of the Fund

The Fund seeks to invest in the Underlying Fund, which employs an environmentally driven top-down framework with a rigorous fundamental stock selection process.

The investment manager of the Underlying Fund is TT International Asset Management Ltd (Underlying Investment Manager).

The Fund gains exposure through the Underlying Fund to a portfolio of global listed companies across countries and sectors. This is a pure-play environmental strategy; it aims to have at least 80% of invested capital in companies where the majority of gross revenues and/or profits stem from tackling a specific environmental problem, and all holdings must make material positive impacts on the environment through their activities.

Significant benefits of investing in the Fund

Significant benefits of investing in the Fund include:

- an investment vehicle dedicated to environmental causes

- exposure to a portfolio of global listed companies, professionally managed by an experienced and qualified investment team
- diversification benefits across countries and global industry sectors that would be difficult to achieve through a direct investment approach
- due diligence aimed to limit any negative sustainability effects of investment decisions
- exposure to a team of global analysts covering both Developed and Emerging Markets, supported by a Research Advisory Board of leading academics and policy makers
- to have an even greater impact, the Underlying Investment Manager donates a third of its management fees to environmental charities
- regular monthly reporting on your investment including performance returns against benchmark, key investment decisions and portfolio strategy;
- online access to information about your investment through Copia's website; and
- investment education and fund manager insights, both in document and digital formats, by subscribing to the monthly email newsletter for the TT Global Environmental Impact Fund.

You should read the important information about the significant features of the Fund before making a decision. Go to the 'Other important information' section of the Additional Information. The material relating to the significant features of the Fund may change between the time when you read this PDS and the day when you acquire the product.

4. Risks of managed investment schemes

All investments carry risk. Different strategies may carry different levels of risk, depending on the assets that make up the strategy. Assets with the highest long-term returns may also carry the highest level of short-term risk. The significant risks of investing in the Fund are:

Market risk: the risk that markets may perform poorly and the returns from the securities in which the Underlying Fund invests may underperform returns from the general securities markets. Securities markets may experience periods of high volatility and reduced liquidity in response to governmental actions or intervention, economic or market developments, or other external factors (including natural disasters, social unrest, war, or pandemics). The value of a company's securities may rise or fall in response to company, market, economic or other news.

Investment selection risk: the risk that the specific investments chosen by the Underlying Fund will not perform as well as others. Some factors that may affect the value of a security are specific company earnings, management changes, competitor behavior, economic conditions, liquidity, investor sentiment, currency and commodity price movements, government policy and global events. There is also the risk that the strategy of selecting growth stocks may underperform relative to other investment strategies.

Counterparty risk: the risk that counterparties to derivatives used in the Underlying Fund may fail to meet their contractual obligations. The Fund will not hold derivatives, however the Underlying Fund may invest on a limited basis in derivatives for risk management purposes and efficient portfolio management. The main derivatives that the Underlying Fund may invest in are warrants and share purchase rights. Investing in derivatives could expose the Underlying Fund to risks related to the counterparties in such transactions. There is a risk that the counterparty will not fulfil its contractual obligation to pay monies or deliver monies to the Underlying Fund, which may result in a loss.

Currency risk: the risk that the value of an asset or investment may fall on the basis of a reduction in the relative value of the denominated currency of that asset or investment. Currency markets can be extremely volatile and are subject to a range of unpredictable forces. The Underlying Fund invests in securities issued by companies that are located worldwide. Foreign securities are usually denominated and traded in foreign currencies and the value of foreign currencies relative to the Australian dollar fluctuate continuously. The Fund's exposure to foreign currencies is not hedged back to Australian dollars. This means that the Fund is exposed to changes in exchange rates. There is a risk that exchange rate fluctuations will cause the Australian dollar value of the Fund's assets to fall. For example, a rise in the Australian dollar relative to other currencies will negatively impact investment values and returns.

Emerging markets and developing markets risk: the risk associated with investments in companies in emerging markets and developing markets. The Underlying Fund may invest in equities issued by companies in emerging market countries, which may include Brazil, China, and Russia. Many investments in emerging or developing markets can be considered speculative and the value of those investments can be more volatile than investments in more developed markets. In particular, there may be higher costs associated with transactions in emerging or developing markets' securities than transactions in non-emerging markets' securities, inflation and rapid fluctuation in inflation rates, greater risk of government involvement or influence on a country's economy, less rigorous reporting and accounting practices, higher counterparty risk and liquidity risk, risks that any arrangements or agreements will not be upheld by the court of any emerging or developing market country, less reliable trading or settlement systems, and higher transaction and custody risk. This means that there is a lower level of investor protection compared to investing in more developed markets.

Pandemic risk: the risk that a pandemic could adversely affect an investment in a security or in markets or issuers generally. On 11 March 2020, the World Health Organisation declared COVID-19 a global health pandemic. The duration of this virus, as well as its economic and other affects, are unknown.

Liquidity risk: the risk that units in the Fund that are not actively traded may not be readily converted to cash without some loss of capital. The Fund may not be suitable for investors seeking a short-term investment, who are averse to unit price volatility or who are unable to sustain a loss of investment capital.

Regulatory risk: the risk that changes to laws, regulations and regulatory policy and guidance may change, adversely affecting the operation or economic benefits of the Fund. All investments carry the risk that their value may be affected by changes in laws, particularly taxation laws.

Compensation fee structure risk: the risk the Underlying Investment Manager may be unduly incentivised by compensation structures. The Underlying Investment Manager may receive compensation based on the performance of the investments of the Underlying Fund. These arrangements may create an incentive for the Underlying Investment Manager to make more speculative or higher risk investments than might otherwise be the case.

Structure risk: the risk that the Fund's structure or its management may change over time. The Underlying Investment Manager may experience changes in its key investment team, which may impact the Underlying Investment Manager's performance and the performance of the Underlying Fund. There is also the risk that the Fund ceases to have access to the Underlying Fund.

Concentration risk: the Fund will invest predominantly in the Underlying Fund, and therefore it will not have diversified investments. Further, the Underlying Fund's typical portfolio holdings of 20 to 40 stocks represents high investment concentration. The lower the number of stocks, the higher the concentration and, in turn, the higher the potential volatility. There are also risks associated with investing in small-sized and medium-sized companies, as these companies tend to be more volatile and less liquid than securities of large companies.

Compensation fee structure risk: the risk the Underlying Investment Manager may be unduly incentivised by compensation structures. The Underlying Investment Manager may receive compensation based on the performance of the investments of the Underlying Fund. These arrangements may create an incentive for the Underlying Investment Manager to make more speculative or higher risk investments than might otherwise be the case.

Structure risk: the risk that the Fund's structure or its management may change over time. The Underlying Investment Manager may experience changes in its key investment team, which may impact the Underlying Investment Manager's performance and the performance of the Underlying Fund. There is also the risk that the Fund ceases to have access to the Underlying Fund.

Concentration risk: the Fund will invest predominantly in the Underlying Fund, and therefore it will not have diversified investments. Further, the Underlying Fund's typical portfolio holdings of 20 to 40 stocks represents high investment concentration. The lower the number of stocks, the higher the concentration and, in turn, the higher the potential volatility. There are also risks associated with investing in small-sized and medium-sized companies, as these companies tend to be more volatile and less liquid than securities of large companies.

General risks: there are a number of other risks associated with an investment in the Fund. It is important that you carefully consider the risks of investing in the Fund and that you understand:

4. Risks of managed investment schemes (continued)

- the value of investments will vary over time
- the level of returns will vary and future returns may differ from past returns
- returns are not guaranteed and you may lose some, or all, of your capital
- laws affecting registered managed investment schemes may change in the future, and
- the level of risk for each investor will vary depending on a range of factors including:
 - age
 - investment time frames
 - where other parts of your wealth is invested, and
 - your risk tolerance.

Taxation risks: taxation law is constantly evolving and being amended. Changes to taxation legislation during the term of the Fund may impact adversely on an investment in the Fund. Investors are advised to obtain their own professional taxation advice.

Delivery risks: although the Underlying Investment Manager applies a stock selection process and closely monitors investments, there is a risk that the management of the investee companies may make decisions and take actions inconsistent with the goals of the Fund of tackling a specific environmental problem and all making material positive impacts on the environment through their activities.

You should read the important information about the risks of investing in the Fund before making a decision. Go to the 'Risks of managed investment schemes' section of the Additional Information. The material relating to the risks of investing in the Fund may change between the time when you read this PDS and the day when you acquire the product.

5. How we invest your money

Warning: Before choosing to invest in the Fund, you should consider the likely investment return, the risk, and your investment time frame.

Description: The Fund is an unlisted registered managed investment scheme governed by the constitution of the Fund. The Fund will invest solely in the Underlying Fund that is managed by TT International Asset Management Ltd. The Fund may be suitable for investors seeking capital growth from a diversified portfolio of global equities.

Investment objective: The Fund aims to provide a total return (after fees and expenses) of 2% or more in excess of the MSCI All Country World Index NTR AUD over a rolling three-year period. In addition, the Fund has an impact objective to drive capital to pure-play environmental companies - i.e. those companies which provide key solutions to environmental problems, including both climate change and biodiversity harms.

Investment strategy: The Fund's strategy is to gain exposure, through the Underlying Fund, to global companies that are delivering solutions to the problems of climate change and ecosystem destruction around the world. The strategy aims to generate strong long-term returns by investing in the leading global structural growth theme – the green transition. It is a pure environmental strategy: all investee companies must produce products or services that tackle an environmental problem. The Fund aims to have at least 80% of invested capital in companies where environmental solutions account for at least 50% of gross revenues and/or profits. There is a full and firm wide exclusion on controversial weapons (cluster munitions, anti-personnel mines, chemical weapons, and biological weapons). The Underlying Fund may not invest in businesses that derive more than 10% of their gross revenues/operating profit from significantly environmentally harmful activities (e.g. coal, oil, gas, internal combustion engines, single-use plastics) nor in companies that produce nuclear weapons, tobacco, nicotine alternatives and tobacco-based products (these are screened out at a 0% gross revenue threshold). The Underlying Fund is actively managed and is based on a rigorous fundamental stock selection process within an environmentally driven top-down

framework.

Strategic asset allocation:

The Fund typically invests within the following guidelines:

- Underlying Fund 80% - 100%
- Cash 0 – 20%

Investment timeframe: Five year plus investment period. This is a guide only, not a recommendation.

Risk level: High – the likelihood of your investment going down in the short term is relatively high compared to investments in funds investing in other types of assets such as fixed interest or cash. See 'Risks of managed investment schemes'.

Fund performance: The Fund's performance is available on the website, and the link to this is accessible on page 1.

Other investment considerations: The RE fully invests the Fund into the Underlying Fund. In doing so, the RE relies on the Underlying Manager to take into account labour standards and environmental, social and ethical considerations when making investment decisions for the Underlying Fund. The Underlying Investment Manager has a firm-wide responsible investing policy which covers the Underlying Fund and its investment processes. Access the policy via this [link](#) for further details.

Other information: For up-to-date information about the Fund's performance and unit prices, visit the website, the link to this is accessible on page 1.

You should read the important information about how we invest your money before making a decision. Go to the 'How we invest your money' section of the Additional Information. The material relating to how we invest your money may change between the time when you read this PDS and the day when you acquire the product.

6 Fees and other costs

Did you know?

Small differences in both investment performance and fees and costs can have a substantial impact on your long-term returns. For example, total annual fees and costs of 2% of your investment balance rather than 1% could reduce your final return by up to 20% over a 30-year period (for example, reduce it from \$100,000 to \$80,000). You should consider whether features such as superior investment performance or the provision of better member services justify higher fees and costs. You may be able to negotiate to pay lower fees. Ask the Fund or your financial adviser.

To find out more

If you would like to find out more, or see the impact of the fees based on your own circumstances, the Australian Securities and Investments Commission (ASIC) Moneysmart website (www.moneysmart.gov.au) has a managed funds fee calculator to help you check out different fee options.

This section shows fees and other costs you may be charged. These fees and costs may be deducted from your money, from the returns on your investment or from the assets of the managed investment scheme as a whole. Taxes are set out in another part of this document. You should read all the information about fees and costs because it is important to understand their impact on your investment.

Fees and Costs Summary

TT Global Environmental Impact Fund

Type of fee or cost	Amount	How and when paid
Ongoing annual fees and costs		
Management fees and costs^{1,2} The fees and costs for managing your investment.	0.95% p.a. of the Net Asset Value of the Fund.	The management fee is calculated on the net asset value of the Fund. It is reflected in the daily unit price and payable monthly in arrears from the Fund.
Performance fees^{1,3} Amounts deducted from your investment in relation to the performance of the product.	Estimated to be 0.00% of the Net Asset Value of the Fund.	A performance fee of 20.50% is accrued daily and payable quarterly on any excess performance (after deducting the management fee) above the benchmark within a performance fee period, subject to a high water mark. The performance fee is calculated and accrued each Business Day and is reflected in the daily unit price. The performance fee is payable quarterly on 31 March, 30 June, 30 September or 31 December.
Transaction Costs⁴ The costs incurred by the scheme when buying or selling assets.	Transaction costs are estimated to amount to 0.22% of the Net Asset Value of the Fund.	Transaction costs associated with dealing with the Fund's assets may be recovered from the Fund. As some transaction costs will be paid for by investors who are charged the buy/sell spread when they enter or exit the Fund, the transaction costs are shown net of the buy/sell spread.
Member activity related fees and costs (fees for services when your money moves in or out of the scheme)		
Establishment fee The fee to open your investment.	Nil	Not applicable
Contribution fee The fee on each amount contributed to your investment.	Nil	Not applicable
Buy/sell spread An amount deducted from your investment representing cost incurred in transactions by the scheme.	+0.25% of the investment amount. -0.25% of the withdrawal amount.	Charged and paid into the Fund when you invest in, or withdraw from, the Fund. The spread is reflected in the application and withdrawal prices.
Withdrawal fee The fee on each amount you take out of your investment.	Nil	Not applicable
Exit fee The fee to close your account.	Nil	Not applicable
Switching Fee The fee for changing investment options.	Nil	Not applicable

¹ Fees are inclusive of GST and net of any applicable Reduced Input Tax Credits ('RITC'). ² The Fund's indirect costs form part of management fees and costs and are estimated to be 0.43% which is based on the costs incurred for the 12 months to 30 June 2024, as a percentage of the average net asset value of the Fund during that period. ³ As the Fund has been in operation for less than five years, performance fees represent the average of the performance fees charged by the Fund since inception and which reasonably represent what a typical performance fee may be in any given financial year. However, the actual performance fee payable (if any) will depend on the performance of the Fund and the performance fees estimate provided may not be a reliable indicator of future performance fees. ⁴ Transaction costs estimate is based on the transactional and operational costs incurred for the 12 months to 30 June 2024 (including brokerage) net of the buy/sell spread. Using this approach transaction costs are partially recouped via the buy/sell spread on applications and redemptions, to give a net result.

6. Fees and other costs (continued)

Example of annual fees and costs

This table gives an example of how the ongoing annual fees and costs for this product can affect your investment over a 1-year period. You should use this table to compare this product with other products offered by managed investment schemes.

Example	Amount	Balance of \$50,000 with a contribution of \$5,000 during the year
Contribution fees	Nil	For every additional \$5,000 you put in, you will be charged \$0.
PLUS Management fees and costs	0.95%	And , for every \$50,000 you have in the Fund you will be charged or have deducted from your investment \$475 each year
PLUS Performance fees	0.00%	And , you will be charged or have deducted from your investment \$0 in performance fees each year
PLUS Transaction costs	0.22%	And , you will be charged or have deducted from your investment \$110 in transactions costs
EQUALS Cost of Fund		<p>If you had an investment of \$50,000 at the beginning of the year and put in additional \$5,000 during that year, you would be charged fees of:</p> <p style="text-align: center;">\$585^{1,2}</p> <p>What it costs you will depend on the investment option you choose and the fees you negotiate.</p>

1 – this example assumes the additional \$5,000 contribution occurs at the end of the first year.

2 – additional fees and costs may apply. This example does not include all fees and costs that may be applicable to you such as a buy/sell spread, government fees, duties and bank charges may also apply to investments and withdrawals. Additional fees may be paid to a financial adviser if a financial adviser is consulted. You should refer to the Statement of Advice provided by the financial adviser in which the details of the fees are set out.

Fee calculator

ASIC provides a fee calculator on its MoneySmart website (www.moneysmart.com.au) which can be used to calculate the effect of fees and costs on your account balances.

Fee changes

Fees and costs can change at any time in accordance with the Fund's constitution. If fees and charges payable to the RE increase, the RE will give investors not less than 30 days' notice before the change occurs. Other costs such as the buy/sell spread may change at any time without prior notice to you. Expense recoveries may be different to those estimated in this PDS.

Warning: Additional fees may be paid to a financial adviser if a financial adviser is consulted. Refer to the Statement of Advice provided by the financial adviser in which the details of the fees are set out. You should read the important information about fees and costs before making a decision. Go to the 'Fees and other costs' section of the Additional Information. The material relating to fees and costs may change between the time when you read this PDS and the day when you acquire the product.

7. How managed investment schemes are taxed

Warning: Investing in a managed investment scheme is likely to have tax consequences and we strongly advise that you seek professional tax advice before investing in the Fund.

The RE has resolved that it will elect to become an Attribution Managed Investment Trust (AMIT) commencing from the 2021 financial year. Such an election is irrevocable. It is intended that all determined trust components (i.e. assessable income, exempt income, non-assessable non-exempt income and tax offsets) will be attributed to investors each year so that the Fund itself is not subject to tax. The Fund does not pay tax on behalf of resident investors. As an investor you will include your attributed share of the Fund's net (taxable) income, including any net capital gains, in your assessable income. The amount attributed to an investor will be disclosed on an AMIT Member Annual statement that will be issued following the end of the financial year.

In summary, when investing in the Fund, investors should note the following general concepts:

- registered managed investment schemes do not as a general rule pay tax on behalf of resident investors

- net (taxable) income and realised net capital gains generated by the Fund are typically fully distributed to investors who in turn may be subject to tax on allocation of the Fund's net taxable income. The extent to which an investor is taxed will be based on their individual circumstances (e.g. resident/non-resident investor, trust/ SMSF/ company/ individual investor etc.)
- the Fund may allocate an investors' share of any tax offsets (e.g. franking credits or foreign income tax offsets) received during the year, and
- investors may be liable for tax on capital gains realised on the sale of units in the Fund, either by withdrawal, switch or transfer.

This is only a brief summary of the taxation information which is general in nature and only relates to Australian residents. It does not constitute personal advice. You should consult your own advisers for your particular circumstances.

You should read the important information about taxation before making a decision. Go to the 'Taxation' section of the Additional Information. The material relating to taxation may change between the time when you read this PDS and the day when you acquire the product.

8. How to apply

Application process

To make your investment, complete the TT Global Environmental Impact Fund Application Form attached to or accompanying this PDS (application forms are also available on the website or on request from Copia) and send your application money to us in accordance with the instructions on the form.

As part of the application process, we are required by law to verify your identity before accepting your application. We are unable to process incomplete applications. If we do not receive all of the information and documents required under AML/CTF Laws, we will hold your investment amount until we have received all information.

Cooling-off period

Investors who are retail clients (as defined in the Corporations Act) have a 14-day cooling-off period after making an application for units in the Fund during which time they may cancel their investment by notifying the RE in writing or electronically. This cooling-off period will commence from the earlier of the:

- investor's receipt of confirmation of their investment, and
- end of the fifth business day after the issue of units to the investor.

If an investor cancels their investment during this period, the amount repaid to them is adjusted to allow for market movements, reasonable administration and transaction costs and any relevant taxes or duties.

Investments made through the distribution reinvestment plan are not subject to the cooling-off provisions. Indirect investors should contact the operator of their platforms about any right to cooling off.

Complaints procedure

The RE has arrangements in place to consider and seek to resolve any complaints within 45 days of receipt. If you have a complaint, you may contact us by email, telephone or in writing to:

The Complaints Officer
Copia Investment Partners Ltd
Level 47, North Tower, 80 Collins Street
Melbourne Vic 3000

Email clientservices@copiapartners.com.au
Freecall 1800 442 129 (inside Australia only)
Phone +61 3 9602 3199

If an issue has not been resolved to your satisfaction, you can lodge a complaint with the Australian Financial Complaints Authority (AFCA). AFCA provides fair and independent financial services complaint resolution that is free to consumers.

AFCA's contact details are as follows:

Australian Financial Complaints Authority Limited
GPO Box 3
Melbourne VIC 3001

P 1800 931 678
